

Presentation reflection

Month 8 Meeting 16

Students will reflect on their middle and elementary school presentations and start thinking about planning for next year's Team Cyber S.W.A.T.

CYBER SWAT

Objectives

- Identify (at least) three things that went well.
- Identify three things the group wants to do differently next year.

Materials

- (Optional) Survey for team Cyber S.W.A.T. members

Review and Reflections (optional)

Take a moment to let the team discuss the successes of the peer-to-peer presentations as well as what could have been done differently. Make notes so the team can return to them when planning next year's presentations.

Alternatively, team officers can create a short survey for team members regarding Cyber Safety Awareness Week. There are several free online platforms-- such as Survey Monkey or Google Forms-- that would make gathering information fairly simple.

Things to consider

- It can be helpful to include the quieter, more reserved students in this conversation. They likely have been observing everything and have some valuable insights.
- This is the last scheduled meeting of the year. It can be as productive or as casual as you and the team would like!
- Make sure to confirm details (date, time, location, etc.) for the end-of-year recognition with team members.
