

# Planning for the future

## Month 9 Meeting 18

SROs and team members should use this week as an opportunity to plan ahead for the next academic year, and share information with potential team members.

**CYBER** **SWAT**

### Objectives

- Hold an information session in anticipation of next year's Cyber S.W.A.T. program.
- Develop a *sustainability plan* that will allow you to build on this year's success to make next year's Cyber S.W.A.T. team more effective and impactful.

### Things to consider

- Developing a *sustainability plan* can help ensure you capture what this year's team has learned. This doesn't have to be a formal action plan: it can be as simple as making sure you have a record of the usernames and passwords for team accounts, and you know where to find any materials or files you will need again next year.
- This meeting can be as formal or informal as your team would like. You could use it as an information session to get more team members next year, or just touch base with the current team about maintaining momentum when school starts back up.
- Compile any additional information that can help you and the rest of the team hit the ground running next school year.
